

### Selected MEAD JOHNSON Powder Products

When accuracy is essential, gram measurements should be used. Household measurements are provided for convenience when larger variance in prepared dilution is acceptable.

\*Grams (g) per Tablespoon and g per teaspoon are extrapolated from g per cup.

†Packed level measure – all others are unpacked level measures.

NA = Not Available (until several batches have been evaluated for grams per cup)

**Powdered formulas are not commercially sterile and should not be used for premature infants or immunocompromised patients, unless clinically required, and then under strict supervision of preparation and use.**
